

User Interface Organization

Screen	Purpose
Homepage	The first page a user will see when visiting the website. It will contain a search bar and a listing of all available tools. Along one edge of the screen the user's selected tools to check out will be kept track of until they proceed to checkout.
Login Screen	This screen will allow users to login to their accounts. Users must have an account to be able to check out or reserve tools.
Registration Screen	This screen will allow users to create accounts so they can use the website.
Individual Tool Details	This screen will display the details of a selected tool, including the borrowing history and reservation status of a tool. This will also be where users can select a tool for reservation or rental.
"My Tools" Screen	This screen will display the tools a user has checked out and how long they have before they have to return the tools.
Checkout Confirmation Screen	This screen will be where a user goes when they are done selecting tools to check out. It will list the tools and checkout durations a user has selected and ask them to confirm the details. When the user confirms, the tools are marked as checked out in the database.
Administrator Options Screen	This screen will be available only to the administrator account(s). It will contain a number of website debugging tools and it will give the administrator control over existing user accounts.
